 Ventex®-Valve  Nose flange  Washable face seal  Clip on head strap  1-Strap			

D: Masks have passed the optional Dolomite clogging test. Better breathing resistance for longer.

S: Masks are certified to EN149: 1991. This denotes the mask protects against dusts, fumes and water based aerosols. All other masks are certified to EN149: 2001. In 2001 an additional version of EN149 was brought out. In this version the 2 categories 'S' and 'SL' have been combined into one category. The 1991 version and the 2001 version run concurrently. Masks may be manufactured to either version. In order to offer the user a maximum choice of protection, Moldex have kept a number of 'S' level EN149: 1991 masks in the range for those who do not need both 'S' and 'L' protection levels.
